- Scrum
- Node.js
- MySQL
- MVCS
- Express
- MongoDb
- Mongoose
- Git
- Bootstrap
- CSS
- HTML

EDUCATION

CODEWORKS
Certificate of Completion

- full stack software development

APPLICATIONS

Bug-Log
Create and track bugs for your application! Post notes on each bug to discuss with fellow users, and close your bugs once solved.

-Built using Vue.js for frontend and Node.js in the backend.

GRUMblr
Are you and your friends struggling to choose an option for lunch? This app will host a room to invite your friends to, then you'll vote on a few restaurant options in your area! This collaborative group-project uses Google Places API and a group-developed API. The app generates several locations based off the filters you applied.
My main role was in developing the backend API structure, as well as creating Sockets to create live updates between multiple devices.

-Created using a Vue.js frontend and Node.js backend.

Keepr
Create and share new interests by posting images or videos that can be "kept" in a collection("vaults") by users who like the content! All logged in users have a profile, displaying their created keeps and their public vaults. Any vaults set to private are hidden from all users other than the creator!

-Created using a Vue.js frontend and a C# backend, utilizing MySql database.

EXPERIENCE

SOFTWARE DEVELOPMENT STUDENT
CodeWorks, August 2020- Present
- Built various applications with front and back end languages such as Vue, Node, C#, and many others
- Implemented best business practices by utilizing scrum and partner programming
- Collaborated with peers in designing and building a full stack application.
- Integrated Auth0, APIs and sockets into application
- Utilized Figma to create application mock ups to present to senior development team

TEAM MEMBER
Dairy Queen Grill and Chill, October 2018 - January 2020
- Maintained quality and accuracy of customer orders during fast pace environment
- Provided excellent customer service and ensured a valued customer experience
- Practiced strong communication and teamwork to meet the needs of the restaurant
